- At Vroman's Bookstore on Saturday, the Ukelele Orchestra of the Western Hemisphere will perform. They sometimes play sf-related music.
- Dark Delicacies will host a signing Saturday with Sadie Hartmann for *101 Horror Books to Read Before You're Murdered*, and David Scott Hay for *NSFW*.

- Ralph Eugene Lapp

- Sir Daniel Gooch
- Event: Minor planet Pluto

Lynn Maners: In Norway, as the glacier patches retreated more, they're finding discarded clothing. When you're on the verge of freezing to death, you feel hot and take your clothes off to cool down—before you die.

Nick Smith: One of the largest musical instruments ever made was found in the Andes.

It's a floor vault/foot drum big enough for dozens of people to dance on to make percussive sounds. Four dancers were able to make sounds as loud as 80 decibels.

Maners: There's also a floor vault/foot drum in Chaco Canyon.

Regular Announcements

Tom Safer's September screening at the Frances Howard Goldwyn Hollywood Regional Branch Library will be *Luca* on Sept. 16.

If you want to join the Burbank Chorale, they're holding open auditions. The season begins Sept. 12.

Reviews

Eylat Poliner: A meeting review from Gail Carriger—"Dear Eylat, I just wanted to say thank you so, so much for hosting me at your gathering. I enjoyed myself immensely. It made me feel very nostalgic. You really made me feel welcome, and your questions were thoughtful and fun. All the very best, Gail"

Nick Smith went to see the movie *Blue Beetle*, which was definitely worth seeing.

Charles Lee Jackson II: The rumor of a *Blue Beetle* serial dates from the 1960s.

Eylat Poliner: If you haven't seen the *Star Trek—Strange New Worlds* sing-along episode, it's now up there with her favorite episodes such as "The Trouble with Tribbles."

Heide Nichols: If you have any interest in K-Pop—Klingon-Pop—this year's Loscon's music room will offer Klingon-related music.

Chris Marble saw *Haunted Mansion*, which was fine.

Scribbles recommended *The Last Voyage of the Demeter* heartily.

Charles Lee Jackson II recently saw *Peau d'Ane* on TCM. The film is charming and well worth the time.

Matthew B. Tepper indicated that the title translates as *Donkey Skin*.

Tom Safer said the new Guardians of the Galaxy movie is great fun and well worth the price of the DVD.

Miscellaneous

Nola Frame-Gray heard that India had a successful moon landing. Does anyone know about that?

Lynn Maners: They have a rover up there looking for ice.

J.P. Van Gordon offered the links <https://www.youtube.com/watch?v=cqtSjOUTGPK> and https://www.youtube.com/watch?v=NitxniD1I_s.

Frame-Gray asked whether we had to change Zoom rooms for Tom Safer's cartoons. We should stay right here.

Cathy Johnson indicated that there won't be an aftermeeting tonight because of Safer's animation program, unless we want to convene even later.

Call to Adjourn

Eylat Poliner so moved. That was seconded. The ayes had it.

Letter of Comment

I like the way these club minutes are enlivened by reading amusing or scientific short news pieces, such as the stories about satellites and space dockings, and orcas putting the muscle on Spanish boats.

One of the topics that might come up in LASFS business, which might reward future researchers, is how club officers have noticed changes that affect conventions in your area. Some of my correspondents and I have been concerned by the changes in hotel function costs, contractual conditions, and general availability. This might be a twice-told tale to all,

but it still might merit some documentation. Or maybe your club officers, and all your correspondents, have talked the subject to death already.

I see you have regular announcements of sf movie nights, but... are any fans out there holding Mad Science evenings, during which people start with random piles of mechanical and electronic parts, and put together Things without a plan that sort of fit together, revolve and roll, and flash lights and make sounds, and don't accomplish anything besides expending energy? Or design un-useless inventions that nobody needs? Maybe "Maker" groups are what I'm trying to conceive.

In answer to Jeff Delshad's query: It should be possible to find out more about Charles Sheffield by looking at the kinds of titles he produced, and at least one interview, which I believe *Locus* published in the late 1980s. From the few novels I read, he seemed to specialize in sf based on one or more very speculative macguffins—such as a man recovering from cranial damage by transplanting parts of his twin brother's brain to replace damaged parts of his own; a funhouse-mirror version of our world after a nuclear exchange, with each of the continents reorganized as whole nations (except for the Asian wasteland), and a mostly landless tribe of traders negotiating commerce between them; a biofeedback technology that allows humans to modify their features, even their anatomy; or investigating the relics of an ancient vanished alien race, some of them still operating and quite dangerous—many of which showed motifs and references alluding to Near Eastern, rather than European or American cultures. I never quite got a handle on Sheffield's background or outlook.

—Garth Spencer

Locus also published an appreciation of Sheffield in 2002, which might prove interesting. (<https://tinyurl.com/Locus-Sheffield>)
