ODDS N ENDS

Ray Sinclair dies in England last Friday. He had written 37 books, the last published in 1931.

Latest to receive the English motion picture "Dead of Night" is Harry Warner. He says that it was done with admirable restraint and with a peculiar, ambiguous ending -- "I can't decide whether it was supposed to signify an endless cycle, or the beginning of the end." Ackerman says that Fritz Lang is reporting Michael Redgrave; the regularologist of "Dead of Night", for the lead in "The Secret Behind the Door", unusual number mystery -- without a murder!

Boff Perry cards that he is a college sophomore with a physics major and courses in Calculus, German, and physics, etc.

Nicholas Carr checked on Karl Capek's death, and such to surprise, reported it to have been in 1938! I had figured the clipping to be several months old, not 8 years. I'll have to clean out that drawer more often.
