FINDY SILVER BERG 24 E. 82 ST.

Hello out there. This is my first attempt at putting out a fanzine, the I've been a fan for about two years now. I had put out a carbon-zine that aborted after two issues, but I don't think that really counted as tounted a fanzine. It had a circulation of four; me, two friends, and my desk drawer.

I suppose I'll explain myself to the mass of you, those who've never metme. I seem to have a rather interesting reputation. Mainly, whenever I introduce myself at a fan gathering, a great deal of the seem to the seem to have a rather myself at a fan gathering, a great deal of the seem to the seem to have a rather myself at a fan gathering, a great deal of the seem to have a rather myself at a fan gathering, a great deal of the seem to have a rather myself at a fan gathering.

1408/801 IA TRATA ARAFE = 48of brace themselves. This I attribute to lingering remains of the statement by Donald Wollheim that I was "a second Degler". People still expect me to make some startlingly shocking statement that will prove conclusively that I really am a total fool, and then they're surprised when I don't go around gathering names for a rejuvenated 'Cosmic Circle'.

Of course, by this time I suppose that D.W. has mellowed on me considerably. I've evidently turned out to be the same type of neo that S. has been turning out for the last 20 odd years. After all, J.W. introduced me to fandom.

Tyred on Smith-Corona Fortable & Underwood Five, this issue is dedicated to Ed Meskys, well known fan, the one who builds H-bombs for a living.

SONG OF MYSELF...

I do suppose I could provide a little information about myself, At the moment, I attend an East Coast Prep school, a member of the Senior Class, hopeful of attending New York University at Washington Square. I am firstly a collector and secondly a fan, with tendings toward illustrating. Ly illos have appeared in Free Radical & the 200 Kercurian S.F. society mag. I have a monthly column in S.F. Times. My collection is now over the 1,000 mark and aiming for two. My great love is the paperbacks. I now have all the original SF from Ballantine (first printings; not the recent spate of reprints) and all except 5 or 6 from Ace, am as well as a great many other pbs.

That's it for now, lads! See you nextish.
