#### AMOUNCIALNY OF COSMIC FANDOM AND THE COSMIC CIRCLE

For several millions of years creatures that could be called human cave struggled on the long rise upward to intelligence and civilization. For much of that time they have lived much like the otpr great simians, without benefit of clothing, fire, stone impleents, or even bow and arrow.

Over a million years ago man began to use stone implements, discovered fire, and somewhat later began living in primitive commuarties, to downsticate animals and plant crops, and there came the intention of witch doctors, tribal taboos, and ceremony, clothing morels, and what have you.

It was only about 8,000 years ago that crude picture writing and hieroglyphics were inaugurated, and the first date in recorded

history is something like 6,000 years ago.

560 Section

lines this date the empires of Sumeria, Phoenica, Ur, Crete, Expt: Carthage, Greece, kome, and many others have risen and fallen.

One bloody war, tyrrany, and dictatorship has followed another.

The COSMIC CIRCLE is apposed to all forms of dictatorship, and La Cosmic Civilization which our children will one day build will mover crumble to ruin and pass like the others into the dust of centuries. The Race of Coamic men and women will be invincible because they know and believe in the COSMIC CONCEPT, the Cosmic Viewpoint of things. We are they whomail. G. Wells has termed "Star Begotten."

Men have been abject slaves to the crossest; - m b s t idiotic superstitions and hocus-pocus-inaginable! Hen have to r to r to r t d. k i l l c à, and offered up human saprifices in the name of tribal priests, superstitions, powerful tyrants or cruel gods. No conceptation of intelligent reasoning, science and logic, and the brotherhood of man. No systemstaic search to truth and knowledge based on

logical deduction from observation of nature's laws instead of supernaturalism. No research based on instation, the trial-and-error method.

That which was to someday bring about the new race lay slumbering in the germ plasm. And long and terrible to contemplate was the dark night of superstition that held its grim sway so long over the world and mind of man!

Through the Dark Ages, when the most abysmal ignorance and crass superstition prevailed — when religious wars of mass annihilation. I were fought — when the first scientists were burned like Bruno of made to retract their "unholy heresies" like Galileo's theory of carth and planets circling the sum, the light of Science and Thought burned low indeed.

It was not until after the discovery of America and the 17t... and 19th centuries that science and invention got their first rial start. Men began to experiment, to entertain doubts as to the validity of the old hid-bound suppositions handed up from their Cro-Magnon ancestors (or perhaps from the Neanderthalers before them!). The light of reason began to flicker feebly, then burst into an ever-brightening flam. A flam of Hope for the human recoi

America was a democracy. Mon were freer, practically for the first time, to think, to work and invent. One invention followed another with amizing rapidity. The steam engine, electricity, gaso, line engine, airplane, radio, atom smashers and television were produced. The list is endless: all the inventions of the radion tubes.

With the increasing part science was playing in our daily lives, and with so many people interested in science and scientific theories, some authors and imaginative persons began to speculate and imagine what things would be like, what inventions there would be 100, 1,000 years from now. What would the future be like? They wondered if there would be ships to travel to and from other worlds just as ships travel to other countries across the seas today.

So they wrote stories about these things, and many more. It was a new kind of literature they created. They were pioneers: Jules Verne, H. G. Wells, a. Merrit, Rider Haggard, and Ray Cummings, to mention a few. In the early 1900's, a new field of literature and

human endeavor was introduced.

Science Fiction, or Scientifiction as it came to be called, was for a coming generation. It was, and is, the literature of the future. It was not until the April of 1926 that the first magazine devoted entirely to science fiction appeared on the newstands. It was the old AMAZING STORIES. Later came WONDER and ASTOUNDING. Following, came all the others, until just before the war there were some 18 professional publications of this type; And as teritable host of anatours.

Science Fintion Fender has slowly developed, grown and evolved through the years, adding converts to its ranks in all parts of the

country, England, Australia, etc.

It is presumed here that the reader has at least a vague, or fair knowledge (as the case may be) of Fandom. What it is all about, who the leading fans are, etc. It is impossible to dwell at any great length here on the almost endless history, complications, and panifications of fandom in general.

However, if you are somewhat new, or not well-acquainted with the fan world, or just an interested party and wishing some informa-

tion, please feel perfectly free at any time to write for any information or assistance to the COSMIC CIRCLE in care of Vergie Allen,

214 Forth 20th, Newcastle, Indiana.

As E. E. Evans stated in a paper he read before the Denver convention in 1941, Fandom has at last come of age, and it has reached a much more mature state of affairs. Fans are doing things in more of a business-like manner.

But all this, though showing much progress for a start, is in itself far from being enough. nor does the current status of fandom anywhere near represent a desired attainment or an ideal state of affairs: There is much lacking — much left to be desired. Let us for just a moment examine aspects of the set-up.

What is a FAN? A fan is a resder of science fiction and fantasy who writes to the readers clumms, to other fans, writes for or puts out a fanzine, or who is a member of a fan club or takes an active interest or part in other activities pertaining to fandom.

Fans write letters to the magazines, to fanzines, carry on correspondence, collect magazines, books, (some of them phonograph records) and have get-logethers, where they love to talk and patter about all manner of things — artists, illustrations, this story "stinks" or this particular one should have a boquet of orchids. Or so-and-so is a louse, an introvert, or even less complementary assertions! There is too much of this latter sort of thing in fandom.

There istnothing in all the world like the downright ecstacy and cosmic companionship afforded by an all-out fan gabfest! There things are infinitely desirable and such fan activities should be

made none numerous.

The point we are trying to get at is this: While Fandom is on a high path, a road of promise of great things to come, we cannot help feeling that these things alone are not enough—that while we do all these things too. They are not sufficient by themselves. This is not all there is, or is to be, of the lofty ideals and the great purpose a n t plane to believe in for the future of our beloved

Selence Fiction Fundom. No! A million times no.

whether the magazine's edges are trimmed or not, and to whether your fellow fan is a louse, or perhaps has just been victimized like poor old Ymgvi. But entirely too much attention is paid to matters like these, and not nearly enough to the science and concepts in the stories, science in general, and the leading scientific viscoveries of the day, some of which many fans have never even heard of and which are just as wonderful as most of those in the stories; or to even the most meager knowledge of what is now known of physics, astronomy, biology, psychology, relativity, electronics, etc., which most of the stories are about, or make reference to.

Many fans have snot themselves into their own little world

Many fans have shat themselves into their lown little world of prozines, fansines, and fan activities to such an extent that they are literally stranger to their own lamilies. They give very little thought to, or even know what is going on in the universe outside their own little circle of fans, or to the sociological and psychological conditions and developments, of which their fandom is in integral part, and which will determine the Future they constantly rave about!

Now while it is a truism that most fans know translously more about science and scientific theories than does the public.

many fans display an ignorance of even the most simple facts of scionce which is as pathetic as it is depressing.

#### COSMIC FANDOM

Science has to explore the entire field of reality. Everything — absolutely everything — is in the realm of scientific investigation. S. F., as its name implies, is literature with a scientific basis or background of science. Therefore S. F. may be written about any science, or everything or occurence whatsoever: Science Fiction is as broad as Existence, as big as the Universe.

And so we have called ourselves COSLIC FANS, and the World-wide Organization of cosmic-minded men and women the COSLIC CIRCLE, because we are fans of the entire cosmos. We are "fans" of everything

- of all that is, that was, and that ever will be!

and now the time has come then themselves in accordance with world, and to all those who now feel themselves in accordance with our doctrine, who are interested and wish to know more. When a redefinitely science fiction fans, but of a Fandon that is fuller, broader, and greater in scope. Hugo Gernsback and other "old timers"

must, we believe, have envisioned something like this.

We want to know and i told to know what the colatest discoveries are and what is now known of Electronics, Biochemistry, Astrophysics and other branches of science. The stories we love often contain mention of these. How can we understand or appreciate the stories if we do not have even a brief working knowledge of these? (N ch information can be picked up in the Science department of a public library in your spare time.)

We are vitally and intensely interested in the affairs around us, sociological, psychological and scientific -- in world condi-

tions, in the great humanity, of which fandom is a part.

We are interested in that humanity. We hope to convert namy of them to our cause. We think we may be able to someday better these conditions, because of our understanding of science, and of human nature, and our intense and burning desire to see and live in a better world, like the ones we read and dream about in the portals of science fiction.

By now someone may be calling us vain idealists. In idealist is a desirable beings. A man who has ideals has something to work, and live for. Many of the world's greatest thinkers were idealists. There's one thing wrong with most idealists — they are usually not practical enough to put their ideas across, even though those ideals are sound and workable.

. We are trying to avoid that old mistake. We intend to get back of our ideals, and bush and shove, plan and work, until we get some RESULTS.

That's the trouble with many fans. They aren't interested enough in the purposes described. They are more content with just sitting by, and letting things happen as they will, content to talk about, and comment on fuvure civilizations, but never, never trying to do anything that would perhaps better ours, and help to bring about that scientific world of the Future, or start a big campaign to get the general public interested in S. F., which would eventually do a great lead toward bringing about a scientific civilization and the liberal democracy we are working for.

We are going to do all in our power to further Science Fiction and Cosmic Fandom, which we believe is to further humamity and make the world a better place to live in. Our unofficial motto could well be, "I came, I saw, I DID SOLETHING ABOUT IT!" and not "I came, I saw, I RAN like hell."

Wherever big things are being done for the advancement of the human race, wherever scientific investigations are going on, there in the foreground or behind the scenes, in there pitching, doing their part. There will surely be one connected with these happening in some capacity — certainly there will be Cosmic Fans vitally torested in them and keenly studying and observing the outcome possibilities.

THE NEW RACE OF COSMEN THAT HAS EVOLVED FROM SCIENCE FICTION FAMOUND

So this is an announcement of COSMIC FANDOM ("fans" of the entire cosmos), and the COSMIC CIRCLE (A World-wide organization of cosmic-minded men and women), but it is more of a little of example of a new body of thinking people, a new way of life, a cosmology or philosophy of all things, known can the COSMIC COMMINER.

All life evolves and changes—the Universe changes on evolves. Virus bacterium, protozoa, worms, fish, amphibians. Baurians, manlines, an me. This is inexorably forced by the lecend Law of Thermodynamics.

Man is still avolving toward a higher form of the ... w figure is climited upon the State. Home to make, who CONTOL N. will
appear. We believe that we are mutations of that species — we and
all others who think and believe as we do be they are of far. It
ight read of the turn the locks beyond the normal today who
with a min mure of blind faith in tottering theological fantasics,
is one of us

The majority of our adherents are science fiction fans, and this is as it should be. However, we are convinced that there are a considerable number like ourselves on this plan. If only we could locate the get in touch with them. Someday a will find things together

REASON, "THE COSMIC CONCEPT " and "NOV. TERRA" (the New Parth). It is hoped that the first should be ready for publication before too

ndom in beautiful detail with analysis of all history whys and who refore, the world today and possible near future, with a genal things. It will embody a wealth of psychological material, a treasure-house of data on the mass of the human mind—and possibly alien life-forms. But its most of the human mind—and possibly alien life-forms. But its most icance will be mind to be persected and philosophy to another, until finally there evolved the COSMIC CONCEPT.

#### THE COSMIC CIRCLE

#### WORLD-WIDE ORGANIZATION OF COSNIC MINDED MEN AND WOMEN

who is a Cosmic Fan? A person with a cosmic viewpoint of things, a fellower of the Cosmic Concept. A seeker after truth and knowledge an advocate of that fuller and broader fandom described, a fan of all the Cosmos. The Cosmic Concept is a cosmology of all things—a cosmic philosophy. Anyone in the whole world may, if they so wish to consider themselves, be called a Cosmic Fan.

The COSMIC CIRCLE is a world-wide organization of cosmic-minded men and women. The COSMIC COUNCIL (or "High Command" as sometimes humorously referred to) at present consists of four persons (see bottom of first page), or three Cosmen and a "Cosmette" (word coined by Rex Matthews). Don Rogers, Helen Bradleigh, Rex Matthews, and Raymond Washington, Jr (of the Star Flecked Cosmos) make up the Council, the governing body of the Cosmic Circle.

Then come the various officials, heads of departments and committees, directors of various research projects, state and local representatives, etc. These are all in the Tunar Circle, as is also anyone who pays the fee of 95¢ (semi-annually), which includes the

official publication, COSMIC CIPCLE MONTHLY (12 issues.)

The Outer Circle consists of anyone who wants to be in it, anyone who considers themselves to be a Cosnic Fan, or cosnic-minded man or woman. There is no charge of any kind for anyone to become a member of the Outer Circle: there is no obligation, no strings attached whatsoever. There is nothing that you have to buy, and no

activities you must take part in.

After you have completely read this, you will surely know whether the title COSMIC FAN applies to you or not. You alone are the sole judge! For who could know better than you, whether you could be called a cosmic fan? (If you desire any information, or are just an interested party, remember to always feel free to write!) To be a Cosmic Fan, a member of our Outer Circle, it is only necessary to SAY YOU ARE ONE, by dropping a posteard or letter to 214 N. 20th, Newcostle, Indiana, right away!

Just state that you want to be a member — "I am a cosmic fan," or anything else that you want to say. Your name will be entered in the BOOK OF THE COSMEN (which we be lieve will contain the intelligentsia of this planet), and you will be sent free the quarterly COSMIC DIGEST and other bulletins and information from time to time, so, that

you may keep in touch with all that's going on.

You will be sent a membership card, stickers for your fan mail, and a sample group of colored scientifictional envelopes. The resources of the Organization, in the various services and free helps, and the Planet Bureau of World Information, are advantages and services you may use if you so desire, as a member of the Circle.

There is absolutely NO CHARGE Ok OBLIGATIONS of any kind whatsorver connected with this! The services mentioned are actually free

to anyone who sends a postcard and wants to become a member.

No one in the Outer Circle is EVER required to do anything else. You can always stay there if you wish to do so. We reiterate, there is no charge of any kind to be a member of it. Simply send a post-card, when you have finished reading this.

Cosmic Digest : : : Page 8

L large colored picture of the planet Earth between a v for Victory (suitable for framing in your study or den), the famous "V-Globe", symbol of Victory for a scientific civilization encompassing the world, may be obtained for 2 dimes; when these are printed. But these are optional. It is unnecessary to buy anything at all.

these are optional. It is unnecessary to buy anything at all.

To be in the INDER CIRCLE, it is only necessary to send (at any time you may so desire) 95¢ (semi-annually) which includes twelve issues of the official publication, COSMIC CIRCLE MONTHLY. Anyone in the Outer Circle may do this at any time, and then the become one of the Inner Circle, though they do not have to exceed so. But whether you are in the Inner or the Outer, you are a sufficient of the COSMIC CIRCLE. That is what really counts!

OF THE COSLIC CIRCLE. That is what really counts!
We are trying to get in touch with everyone in the whole World who is interested in cosmic things, as we are, who may want to be

come mone of us"! It is only necessary to drop a postcard.

This is not a new or upstart organization, an untried or will attempt. In our home city we have considerable influence and state-wide netoricty. On Feb. 22, the Lamiversary of the Cosmic Party, we had quite a parade, getting a local band to play for us. This as- sembled in Bradleigh square and marched to the Victory Plaza, ending with a pienic in Lamorial Park. Certain city officials are friends of ours. (We helped to get them elegated.) You can read about these things and many more in the C. C. Monthly.

The actual birthday or anniversary of the COSMIC Con CEPT is Feb. 22, 1940, and our movement officially celebrates that date, and thus the third year of our existence ended on this date in 1943. The reminder of this year 1943 till Feb. 22, 1944, constitutes the year

4 C. C. (Fourth year of the Cosmic Concept.)

Up until a short while ago it was mostly a local affair, however. Only recently has it became a national organization and now world-wide. For long periods of time almost no activities were able to be accomplished due to sickness, financial reasons, misfortunes of several kinds, and preoccupation of key persons with other pressing natters.

This amouncement is long overdue. It was mentioned in fanzines and was to have been put out over a year ago, but had to be postponed because of the reasons mentioned. Then when Den Rogers, our crstwhile Go-ordinator or Head Scientist journeyed from Canada to the Boskone (Beston Conference) and Concerd, New Hampshire, down to New York — thence to Savannah, Ga; Hismi, Fla; Mobile, New Orleans, Little Rock, Hemphis and surrounding areas on his "Goodwill Tour Of Fandom" many new contacts and friends were made, such information on thered, and advice and support were received.

Now at last we are ready and really trying to "go to town" as the expression goes. We have new members and spirit, better formed ideas and long-range plans completely worked out (many of these are the result of over 5 years of careful scientific studying and planning!). The first thing then was to send out an announcement. Second, the several publications to be issued. Third, the actual or-

ganizing and field work it will be necessary to do.

New friends have been made, several important personages in the fan world, new support gained, and interest aroused on every hand. We have actually succeeded in organizing several new clubs and even state-wide Cosmic Fan Federations, with two representatives in Canada (at present — more will be formed all over a free world spont)

We are a live-wire, sincerely friendly bunch of felles and gals, men and women who intend to really do things and accomplish something. If you want to get together with a group who has all sorts of long-range plans and activities scheduled, many of which are now in progress, who are actively and sincerely working for the best interests of Fandom, one who is really going to put Fandom on the map in every state in the Union, working to the end that Fandom will become a power or influence in the post-war world at sometime in the future—then by all means get into "THE CIRCLE"! He need the support of all sincere and cosmic-minded fans men and women everywhere. We need YOUR support!

If you are a new fan or just a reader, we will be glad to give you a hearty welcome, and we invite you, personally into our friends. ly Circle. Here is your chance to get in touch with all the fan activities that are now going on, plans for the future, etc. in our

big Cosmic family all over the planet.

If you want to publish a fan ra azinc and don't know quite how. or don't have the equipment and material, we will give you every possible assistance, even t part of material and mine ographings you are desirous of forming a club in your city or area, we will Give you names of fans in y ur vicinity, offer you sur estions as to charter, title, or be of any assistance possible in helping you get started or plan activities, IF YOU DESIRE THIS AID. The Cosmic Circle Supply Depot (where papers, inks, steneils and all fon supplies may be obtained at considerably reduced prices and discount to members); the Fanzine Bureau (which will help suyone in the world plan and publish an armtour regazine, or publish it for them if they out stencils of furnish supplies, or even furnish supplies for them at a low cost); the Manuscript Service in connection with the Office of Cosmic Education (which will furnish you with metalial for your publication free, if you request it); and the Planet Bureau Bureau of World Information) where members may obtain any scientific or factual data to the reputro and these advantages are at the disposal of the make use of these and many more services offered, if they so desire. New services and departments are being added from time to time, as the need for them arises, and as soon as their existence is justified by expansion of the membership.

While we greatly desire and need nature fans, older fans, still we must ALSO HAVE younger blood and the inspiration and Lynamism of youth. If you are "14 years old and read Amazing", or indeed if you are ANY age and read ANY magazine, you may join too! No one is

barred because of age, sex, race, or creed.

Here is the chance for every young reader and fan to get in with the bunch of older fans, and find out what it's all about. Who's Who in fandom, how to publish your own magazine, or take part in any of the other important fan activities, or at least to know and keep in touch with all the bill things that are going on! and also to get acquainted with many other followers of science fiction, fantasy, or weird, just like you and of your own age!

If you care to write to Relen or Don. Raymond or Matthews and tell us what your hobbies and interests are, we can find you correspondents in your own city or vicinity! DO GET INTO THIS WITH US. FANS AND READERS! THIS IS A PERSONAL INVITATION FROM ME (MISS Helen Bradleigh) TO EVERYONE WHO RECEIVES A COPY OF THIS. TO SEED . POST-

CARD NOW!

Cosmic Digest

JOIN OUR "CIRCLE" OF COSLIC LIADER SECTION LILL YOURSELF:

#### THE COSNIC CIACLE!

and this is an appeal to all interested GIALS and GIAL FALS! Let of girls are interested in science fiction, fantasy, or weird. He have several in our organization and are very proud of them. (Layby this is because gals are just naturally so smart or their intuition tells then stf is the literature of the Future, and themen and "Cosmettes" are the people of the Enture, and the Cosmic Concept is the cosmology, philosophy, or "religion" of the Future. Of course prejudiced by being a girl! — Molen)

But seriously, this is an invitation to all girls and women interested in science, stf, fortasy and weird to write to me, Helen, personally — for any information or to become a member. If e girls must all stick together. COLE OF, GIRLS! SEND THAT CARD or letter, RIGHT AWAY. Helen Breaksigh, c/o 214 N. 20th, Newcastle, Indiana.

And boys, and boy fans too: there are really a lot of swell gals, mutant maidens, scientightls in this organization — Coslettes who are distinguished persons in the circles of Cosmic Fandam. I can assure you, you do not know what you are missing, if you not get into it at once! a pastcard can make you a member of the Outer can make you a member of the Illim. CINCLE, which includes the COSMIC CIRCLE FORTHLY, which in addition to all the other great features, contains one of the swellest letter sections of all famlem, personally answered and conducted by Helen.

To young fans and readers I would like to add that we are not cynical, snobbish, evasive, superior, or unimiterested like some fans you may have written before! You can find out what you want to know from us, and be warmly welcomed into the group the same as anyone clae, and treated just as though you had been in fandom for years,

like the old-time fensi

Remember, this can be YOUR organization, the same as it is anyone clasts! All you must do is let Helen or Don KNOW OF YOU. Send that card at once! Then all famon will know of you, and through the DIGEST and COSMIC CIRCLE MONTHLY you will know about .IL FaMDOM! Remember, there is no charge or obligation of any kind to be in the OUTER CIRCLE (and only 95¢ to be in the HMMER and receive the C. C.

IDUTELY.)

This is as good a place as any to state that this organization does not desire to interfere, oppose or compete with any other club or organization. We indeed desire greatly to co-operate with the N. F. F. F. and any sincere groups or persons, who have the interests of fander and Cosmon at heart. Any person the is a member of some other club or organization may become a member of the COSLIC CICLE, and vice versa. This is absolutely not a radical or military organization: Any possible submappedanges in laws anyone commet ted with this Society might advocate or committed for a sould have to be brought about in a democratic way, by the vote and consent of the people.

We are for the Allied War Effort and a United Pations victory 100%! There is no other hope for humanity, for Casmie men and women. This is a struggle for a planet! Unless the forces of Enlighterment win, there could be no Fandom, no glerious scientific civilization of the future like we plan, no pro or fan magazines.

Page 11 : : : Cosmic Digest
a United Nations victory is unthinkable.

#### FREE CONTEST NO. 1 - 20 VALUABLE PRILES

JUST FOR DROPPING .. POSTC.AD.

There is no catch to this. It costs nothing to get in this contest. It is free and the prizes are free. Ill prize winners will be announced in the C. C. INITELY. Anjone, whether member or not, may enter. You don't have to be a mamber to get in the contest. It is for you, and you—many of you who are hearing about the CIRCLE for the first time. To get in the contest all you have to do is drop a postdard with your name and address.

The purpose of this contest is to know how many copies were actually received. Many of the addresses we have are old, and people have done a lot of moving around since then. Also to hear from as many fans as possible and get the opinion of fandom on the matter. We regard and value your opinion very highly: At any rate, we want possibly EVERYORE who receives this, to send a postcard to 214 North 20th, Newcastle, Indiana. There is no obligation of any kind for you

to do so, and you hav WIF A Valuable PRIZE:

After all, it costs a lot of money to put out 1,250 copies of this (over 1500 are actually being put out.—Don.) and we have kirdly sent you a free copy, in a spirit of all sincerity. Would you please do likewise, by at least sending in the one cent card! It is sort of a matter of honor.

Please understand that this DOES NOT make you a member, by sending the card to us in our contest! Indeed, you may be violently opposed to it, and still be in the contest and win a prize. It was stated before, that all you had to do to become a member of the outer circle was to drop a card—this is true. But you must Say you want to be a member, or inseme way signify your desire to become one. Otherwise you will merely be entered in the contest, and of course will not be a member. As previously stated, you may even be definitely against it.

In other words, WE WANT EVERYONE TO SEND IN THE CARD whether for or against! This is sufficient to enter you automatically in the contest. Nothing else to do. If you also wish to become a member, morely SAY THAT YOU DO on the card! But either way, whether you do

or do not, you are privileged to enter the contest.

RULES: 1. This contest is open to anyone, whether members or non-members of C. C. Anyone may enter (except the Council of 4 and high officials and their families.). To enter simply send a postum with your name and address on it. It is not even necessary to write anything else—— naturally we would prefer you giving a few words about your opinion of our Organization and the ideas in this announcement either pro or conf Please feel free to express your honest opinions! This is free America, remember.

2. Names from all cards received will be written on equal size slips of paper, and deposited in the contest box. These will probably be several drawings, so you may have several chances to win a prize, simply by sending in one card. Date of drawing and deadline

will be announced soon in the C. C. Monthly.

3. Slips will be drawn from the box after it has been thorough-

Cosmic Digest and a second sec

ly and freely rotated and otherwise mixed up in the approved Bank Night method, by members of the Council and/or some famous fans or committee appointed by them in presence of these said fans, in order to insure perfect fairness and promote the spirit of fair play. Winners will be ammounced in C. C. M. The contest is MIGHT FOW OF-FICIALLY IN PROGRESS! The sooner you send your card, the surer you will be of getting into it.

4. 1st Prize consists of a one year subscription to any magazine you care to name. 2nd and 3rd prizes each consist of a half yr subscription to your favorite mag (if you win, you tell us what it is). 4th and 5th, a one year subscription to COSINC CIMCIL MONTHLY (12 issues). 11th, 12.13, each receive the copy of C.C.L. in which the winners are announced. 14th to 20th each, a copy of Those

FAMTASTIC EXFERIENCES.

In other words, there will be 20 drawings, 20 big prizes. Each of you has 20 chances to win one of those prizes! Everyone is eligible to win in all 20 drawings. Your name is left in for all 20, even if you have won one prize. So you have 20 big chances for

sending one little postcard.

We want to hear from each one of you, whether you agree with us fully, only in part, or disagree violently and venomously. Helen wants to ask you personally to effer constructive criticism, if you write anything but name and address on your eard. Now ver, nothing you say on the eard will bar anyone from the contest. Don't forget to put your name and aldress so we can send you the prize!

Surely you must have some comment or criticism to make, for or against, some ideas to offer or suggest. We would like to hear each and every one of you give his own personal ideas, opinions and suggestions. Please express any opinion you may have! We're asking

for it.

Many of the fans will be for this - indeed, many have already signified that they are very definitely and solidly the COSLIC

CIRCLE - and some will be opposed, we predict.

But there will be an enormous amount of discussion, argument and controversy—and many fans will leave the smug complacency of their easy chairs by the fire (or the frigidaire, as the case may be) to join in the furore, or to launch a violent discussion.

By the way, EVERYONE who sends a card, whether winning a prize or not, will be sent free a valuable souvenier. This, sent free, to everyone who enters the contests so you CAN'T LOSE. Everyone gets something! You have lots of things to win, and NOTHING to lose.

Drop that card today, before you become busy and forget it.

and if you should also want to become a member, just write that too, on your card when you are sending it anyway for the contest—remember it costs nothing to join the Outer Circle! There are many free advantages—free magazines free member Services and privileges, stickers, stf envelopes, helpf with your club or publishing your magazine if you desire it, etc.

### GATASIS OF THIS ANNOUNCA BUT

Miss Helen Bradleigh, yours for the Cause, was glad to have been the author or writer-uper of this innouncement, but was not and never could have been the creator or originator. The material herein was the long, digilent, and painstaking work of many people over a long

THE COSMIC EVILETIN is an official organ of the Cosmic Circle Society. Raymond Washington, Jr is colver of this first

issue which is being sent without charge to selence-fiction fundom and other interested parties. We are very anxious to receive your comments, which should be sent to the caltor, whose address is Live Oak, Florida. As yet we have no set schedule for this publication.

May 15, 1943 Live Oak, Florida

To me has fallen the task of stenciling all of this first issue, as well as writing a great deal of it, if not all. I was to have received material from Don Pogers (Cosmic Circle Society), but none has arrived. Please bear with me while I explain further.

The Cosmic Circle Society is the sponser. In the following pages you will find information about this organization, its purposes, and

its ideals.

If there are any mistakes, or misleading statements in this issue

they will be corrected in number two.

And there may well be mistakes, for Rogers and the others have no opportunity to read and approve this material. The Cosmic Circle is at a disatvantage as one of its directors lives so far south. We expect to evolve more efficient methods of cooperation soon.

As for this Digest, it is written mainly for fandom, but not exclusively. We wish the support of the fans especially, as science-fiction festers and encourages our aims, but we also operate on the principle that there are many intelligent persons who do not read science fiction, but would favor our movement. Our appeal is meant to be universal.

Vaymond Washington Editor:

What are our aims? I understand them to be the betterment of world conditions, the forming of a bloc of voters who want a scientific and liberal government, a club to unify people who think and who favor the cosmic ideals of science fiction. We intend to advertise for members in professional publications when it seems advisable. We hope to bring about great changes for the better in future years, but we acknowledge that it will be a slow and tedious process.

But there's got to be a starting point somewhere. We don't expect to accomplish miracles overnight. But we do expect to accom-

plish something.

When any group of people decide on accomplishing something, the first and foremost thing to do is to get organized. That is what our society is for. We need your support.

The final details are not worked out yet, but they are in the process of being worked out. A Constitution is being prepared. Meetings are being held. Publications are being planned. Stationary

has been ordered, and stickers shall be forthcoming.

This is not "just another club", a passing whim, or a wildly impossible venture. The officers are sincere, and mean to carry on regardless of obstacles. Their is little chance of the society being dissolved because of the officers being inducted. Their positions are pretty stable at present. The High Command, Cosmic Circle Society, consists of four people: one is a girl; one has been rejected by the Army; one is under-age and shall continue to be for months to come, and the remaining officer seems to breeze along with no fear of the long arm of his Uncle.

When our membership expands, we may hold conferences at the

central headquarters in Indiana.

We do not set ourselves in rivalry with any existing fan organi-

zation. This is one of our basic premises.

If you are interested in the society, and wish to know more about it, write to Vergie Allen, 214 N. 20th, Newcastle

Lay a foundation for improving world conditions Exchange ideas

If you wish, you may be listed as an outer-circle member by writing to on , expressing your sincere interest in this society, and your willingness to have your name listed in the book off members, a purpose to be issued when the society gets well under way. Your name will be then entered in the ledger of the Outer Circle you will receive, free, each issue of the Digest, and porhaps other infermation. The dues for the Inner Circle will probably be announced later, in a future issue of the Digest, or the Cosmie Circle Monthly.

at any rate, you can all write Poge s and ask to be listed in the Outer Circle. Further details will be sent you.

All comments on this issue reaching the editor will be forwarded to logers am the others.
