A BOW TO THE WIZARD

..... Robert Sampson

One pulp hero, at least, went adventuring without armament. Thomas Jefferson "Cash" Gorman managed it, moving through six 1940-41 novels armed only with a silver-dollar pocket piece and his wits.

That was plenty. Gorman's mind, astute, subtle, sharply informed, was the equal of a dozen blazing .45's. His magazine, The Wizard, was sub-titled Adventures in Finance. It was. Written by Phil R. Sheridan, a probable pseudonym, the stories are literate, taut, with action at both physical and mental levels. They feature corporate intrigue set against a realistic backdrop of state and local politics, union interactions, syndicated crime and high flying financial machinations.

Cash Gorman, an adventurer-financier, invests in shaky businesses to build them up and take a profit. Sounds simple. But he must proceed in the face of clever and ruthless opposition. He is always under attack. His problems are major, complex and in the real world. He handles them through a series of brilliant and informed manoeuvres.

Characterisation fades before the fancy footwork. Gorman is well drawn, if shallowly. Other characters are pencilled in as collections of peculiar traits. Essentially, the story is how Gorman out-brillianted the opposition, and this is done well.

The First issue of THE WIZARD, October 1940, was Gild The Sword With Gold. We meet Gorman and he meets Jimmy Ranger, his aide through the series. We are also introduced to Phineas Gardiner, a bulging red-faced caricature of a capitalist. His wealth, tapped by Gorman through various deals, provides the operating fluid for most of the stories. In Sword the subject is an involved swindle with worthless helium land as bait. The swindlers are had in virtually the last paragraph of the novel by some highly tricky sleight of hand Gormanity.

Million Dollar Mutual, December 1940, demonstrates how to save a failing race track against intolerable pressures. The manoeuvring, possibly the most complex ever put into a pulp magazine, is packed with multiple interactions between politics, law, finance and business -- all based in the real world. This is the most successful of the Wizard novels.

Liquid Gold, February 1941, plunges Gorman into labour trouble in the dairy business. Murder in Gold, April 1941, is set in Hollywood. The accounts have been tapped at the studio. The swindlers are very murderous. Gorman is very very slick.

With the June 1941 issue, Sabotage (advertised in April as Saboteurs in High Gear) the magazine is retitled CASH GORMAN. In this novel Gorman takes over an axle-manufacturing plant which Nazi agents and a local traitor are reducing to rubble. Murder in Santa Paula, August 1941, sets Gorman against an entrenched political boss, a massive real estate swindle, an old murder frame, and an exploding dam.

On that high note the series ends, a victim of so-so sales and the wartime paper shortage. Too bad. It was a noble experiment. Whilst the last three novels tend as much to violent adventure as to footwork through the complications of corporate finance all the novels are worth reading. The first two issues are of particular interest and deserve room on any collector's shelf.

23RD APRIL 1972

It is appreciated of course that it is a little difficult for UK fans to trip out to Antwerp at the drop of a hat for a one-day convention. You might also consider making like a tourist and including sidetrips to Bruges, Brussels, etc. I will be willing to help regarding advice on currency exchange, travel arrangements etc. You can also save postage by including your 35p membership subscription when writing to me....I'll pass it on to Paul, the internationally famous Silent Slave of SFAN.

MEMORY LANE PUBLICATIONS/WHIZZBANG PUBLICATIONS/COMIC WORLD

"Captain" George Henderson is a well-known Canadian comics fan and dealer whose black and white fanzines are concerned primarily with nostalgia reprints. In addition they give ample coverage to his bookstore and in view of one comic publishing firm's request, last year, that he stop reprinting their material (and, it is understood, burn the plates) these following issues must be regarded as pirates. It is highly unlikely that the following issues will be in abundance in the future:
