

A 500 m. of the main aquifer.

This thing is being done by yr editor, Tim Marion, on the 13th day of July, on a Sudnay (would ~~be~~ believe Sunday?) morning, and is being done for a variety of reasons. But first of all, the basic and necessary information. Norwegian Gnome Publication 140. Chinese Press Publication 16.

Again, thanks goes to Ned Brooks for invaluable publishing assistance. He spared some of his valuable time to show me how to run David Ortman's mimeo. It was he that told me that I may have to add a ditto paper onto the thing because the Twiltex mimeo paper cannot stand up to abrasion very well, and may very easily tear while trying to reach its destination. I thought that maybe I could staple it twice, but now that I think of it, I do not think that would work very well either, so I'm going to be safe and use a sheet of ditto paper, which Ned says is acceptable and much more sturdy.

This sheet will be sent with the copies to individuals and also through Apanage. In other words, all the regulars. This sheet will not be going through the other apas, APA-50, MISHAP, SEMPA, and SFPA. As a matter of fact, it may not even go through Apanage, but as long as I'm going to be stapling all the copies anyway... I'm not sending it through the other apas because the copies for SFPA have already been sent (I think) and since this publication will be mainly an address sheet, I see no point to it.

But as long as I'm doing this thing, I may as well mention that I've discovered three new apas since the index (ah, the bibliographer's nightmare!). One is called Stobcier, I think, and may very well be a secret apa. I dunno. The other two I hear of from Eric's Fanzine Shadow UNAPA, 5704 Altamont Dr., Kalamazoo, MI 49001. (or information...since when did I know how to type?) I have is that the latest mailing ran around 70pp and all of it is dittod. Also there is The UFO Newsletter, c/o Kurt Erichsen, 155 N.W. Kings Rd. #n207, Corvallis, Oregon, 97330. Actually this latter sounds more like a fanzine, but I quote, "If you send in your comments on ditto or mimeo, they will be inserted in the next NL." A copy is available at 35¢ @ or 3/\$1. I should mention that the 'UFO' in this case is a budding new fan organization - United Fanzine Organization. I think I will be including it in the index in the future.

I think I forgot to mention in the colophon that a sample copy of this is available for either a sticky quarter (which will go into David's pocket) or three 10¢ stamps (which will not go into my pocket for fear of their getting stuck together, but I will probably put them on top of my chest-of-drawers, heheh). Of course a record will be kept.

And now on to our regular feature...
