LIFE MOLECULES

This is the third and I hope last issue of VOYAGE devoted to my drawings of the 1959-1962 era. They were in ink, by the way, instead of my present day felt tip technique. And they were not, as you might legitimately assume from the content, not drawn during a suicidal depression or a moment of lucidity during a psychotic episode. It was just a mood I was in and I explored it.

Maybe too much.
